

Testing Update

Effective March 4, 2025 Dual Swab Copan Collection Kits Update

Effective March 4, 2025- Due to supply constraints the Copan UTM Dual Swab Collection Kit (3C061N - Infor 110097) is in limited supply. We do have an alternative collection kit that will be distributed if/when supply is exhausted:

- Alternative collection kit is labeled BD Universal Viral Transport (UVT) for Viruses, Chlamydiae, Mycoplasmas, and Ureaplasmas (220531).
- This kit contains a UVT red capped vial and a single flexible shaft mini-tip flocced swab.
- Performance of UVT is equivalent to UTM and the mini-tip swab is sufficient for nares specimen collection.
